The 3-layer quality Thermal Carrier Bags from Combi-Therm A/S are made of strong high-tech and lightweighted thermal material, produced in Denmark and exported all over the world. During the years the 3-layer Thermal Carrier Bags continuously have been improved, offering the best possible solution for transportation of chilled, frozen or hot food. A quality thermal carrier bag consist of min. 3 layers of which one layer is made of isolation material (foam or polyester fibers).The 3-layer Thermal Carrier Bags are produced of PE with respect for the environment, are food safe (FDA and BGA approved) and can be recycled. We produce standard and customized thermal carrier bags in various sizes, handles, with/without gusseted flat bottom, printing up to 8 colours. **Vertrieb: SeaPearl HandelsGES. mbH, D 25469 Halstenbek**
